INTERREG EUROPE - Call for additional activities

The Interreg Europe monitoring committee approved the terms of reference of a call for additional activities restricted only to the 258 Interreg Europe projects.

This exceptional measure offers the possibility for approved projects:

- to further exchange experiences on the way the crisis impacts the issue they address and on possible measures to face and recover from the crisis,
- to further improve their regional development policies to better face and recover from this unprecedented situation.

Deadline: **02/07/2021** (14:00 CEST)

HUMAN BRAIN PROJECT AND EBRAINS RESEARCH INFRASTRUCTURE - Call for Expression of Interest on impact of Covid-19 on brain and mental health

Scientists and physicians have today come to recognize the important impact of the COVID-19 pandemic on brain health. This other “silent pandemic” has indeed insidiously crept into people’s lives, with consequences that are difficult to estimate today. To contribute to and deepen COVID-19 research related to brain disorders and mental health issues, the Human Brain Project (HBP) and its research infrastructure EBRAINS are launching and funding a new Call for Expression of Interest (CEoI), inviting researchers to propose new study projects.

- COVID-19 research activities that are linked to and supplement HBP/EBRAINS and other activities at European or national level in this research field, e.g. funded by Horizon Europe, to create synergy and increase impact through including the EBRAINS Research Infrastructure.
- Longitudinal and cross-sectional analyses of patients suffering from neurological and/or psychiatric symptoms after infection with COVID-19, e.g. based on existing large cohorts
- Exploration of changes in brain structure and function in patients that have undergone COVID-19, e.g. targeting brain mechanisms underlying olfaction, memory, fatigue, depression
- Disease mechanisms and genotype-phenotype relationships as far as they concern the brain
- Short- and middle term effects of COVID-19 and related changes on mental health and brain health, e.g. related to age and demographic factors
- Development of mathematical brain models of patients and subjects affected by COVID-19
- Modelling and simulation of COVID-19 disease scenarios using EBRAINS
- Identification, modelling and simulation of drug candidates using EBRAINS
- Research on middle and long-term effects of COVID-19 vaccines on the brain and mental health
- Developing and testing strategies for prophylaxis, based on EBRAINS

Budget: EUR 450,000 Direct Costs. Maximum funding per proposal: EUR 225,000 (plus 25% Indirect Costs). Two proposals will be selected.

Deadline: **30/04/2021** (17:00 Brussels time)

NEW EUROPEAN BAUHAUS: CONFERENCE 22-23 APRIL 2021 AND CO-DESIGNING PROCESS

'Beautiful. Sustainable. Together.' These three words encapsulate the ambitions of the New European Bauhaus. But what exactly do they mean? How can we make our living spaces greener, more affordable, more accessible and overall improve the quality of life for everyone living in Europe? What inspiration can we take from recent projects, and how can we take a truly global perspective to learn lessons on the best way forward?

On **22nd and 23rd April 2021** will be hold a conversation on the New European Bauhaus initiative.
