PFIZER GLOBAL MEDICAL GRANT - Request for Proposal: "Patient Preference Database Blueprint"

This Call seeks to solicit proposals to develop a blueprint for collating, organizing, and storing publicly available results from multiple patient preference studies such as may be found in publications or study reports in a single database, organizing results by disease, treatment class (JAK inhibitors in multiple diseases), patient type, etc. or any other categorization scheme and propose a method for extracting and synthesizing available data so that the existing quantitative preference estimates can be used as weights in decision-analytic models as an alternative to de novo primary data collection.

Deadline: **02/08/2021**
