INTELLIGENT PLANNING AND SCHEDULING SYSTEMS

Manufacturing 4.0: la ricerca che serve all'impresa

April 8th, 2016

Luca Di Gaspero
luca.digaspero@uniud.it

DPIA, University of Udine, Italy

Business Analytics = Data Analytics + Intelligent Decision Making

- ▶ Focus on Quantitative methods (vs Qualitative)
- ▶ (Very) large data sets
- ▶ Exploits the potential value of the data (from data to knowledge)
- ▶ Aims at Smart Decision Support Systems

Business Analytics = Data Analytics + Intelligent Decision Making

- ▶ Exploits the potential value of the data (from data to knowledge)
- ▶ Aims at Smart Decision Support Systems

- 1.0 **Descriptive Analytics**: gains insight from historical data (exploring patterns, relationships) “What has happened?”
- 2.0 **Predictive Analytics**: employs predictive modeling (forecast future results) “What could happen?”
- 3.0 **Prescriptive Analytics**: recommends decisions using **optimization** and simulation “What should we do?”

Evolution of Business Analytics

- 1.0 **Descriptive Analytics:** gains insight from historical data (exploring patterns, relationships) “What has happened?”
- 2.0 **Predictive Analytics:** employs predictive modeling (forecast future results) “What could happen?”
- 3.0 **Prescriptive Analytics:** recommends decisions using optimization and simulation “What should we do?”

*The mission of the **Scheduling and Timetabling Research Group** is to provide effective, robust, and scalable optimization solutions for real-world industrial problems with a **temporal dimension** in the fields of **production planning, process scheduling, workforce management, integrated logistics, inventory management**, exploiting and devising innovative intelligent methods from **forefront research**.*

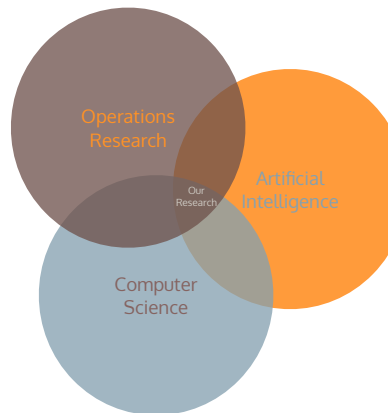

*The mission of the **Scheduling and Timetabling Research Group** is to provide effective, robust, and scalable optimization solutions for real-world industrial problems with a **temporal dimension** in the fields of **production planning, process scheduling, workforce management, integrated logistics, inventory management**, exploiting and devising innovative intelligent methods from **forefront research**.*

- ▶ **Andrea Schaerf**, full professor of Information Technology
- ▶ **Luca Di Gaspero**, associate professor of Information Technology
- ▶ **Sara Ceschia**, PostDoc
- ▶ **Tommaso Urli**, currently PostDoc at CSIRO, Canberra, Australia

<http://satt.diegm.uniud.it>

Our expertise covers a number of different optimization methods and approaches from different research fields:

- ▶ Local Search (AI)
- ▶ Constraint Programming (AI)
- ▶ Nature Inspired Computing:
Genetic Algorithms, Ant Colony
Optimization, Particle Swarm
Optimization, ... (AI)
- ▶ Linear Programming (OR)
- ▶ Mixed Integer Programming (OR)
- ▶ Object-Oriented Frameworks (CS)

We designed and developed research- and production/customer-level software (marked) for the following problems:

- ▶ **Educational Timetabling:** Examination Timetabling¹, Course Timetabling¹, Curriculum Design
- ▶ **Workforce Planning and Scheduling:** Shift Design² (Call-centers, Air Traffic Control), Workforce Scheduling¹, Nurse Rostering
- ▶ **Healthcare Management:** Patient Admission Planning, Operating Room Surgical Scheduling
- ▶ **Production scheduling:** Steelmaking and Casting Integrated Planning and Scheduling³

¹ EasyStaff S.r.l., ² Ximes GmbH., Vienna, Austria, ³ Danieli Automation S.p.a.

- ▶ **Optimized Logistics:** real-world Vehicle Routing with heterogeneous carriers, Integrated Routing and Packing, Ready-Mixed Concrete Delivery⁴
- ▶ **Smart Mobility:** balancing bike sharing systems
- ▶ **Healthcare logistics:** integrated homecare routing and scheduling

⁴ Ateikon S.r.l.

Industrial Projects and Partnerships

Production Scheduling

Production Scheduling

Workforce Scheduling, Educational Timetabling

Focused Grant Program **Models and metaheuristics for real-world problems in integrated logistics**

Integrated Logistics

PAR-FVG Process Management

Steelmaking and Casting Planning and Scheduling

Ready-mixed Concrete Delivery

PATAT 2016

To those interested

The image shows a website banner for PATAT 2016. The background is a blue-tinted photograph of a classical building facade with a large clock and a stone bust. The text is white and centered. At the top left is the PATAT 2016 logo, and at the top right are navigation links: HOME, COMMITTEES, SPONSORS, and SOCIAL with a dropdown arrow. The main title 'PATAT 2016' is prominently displayed, followed by the subtitle '11th International Conference on the Practice and Theory of Automated Timetabling' and the location and dates 'Udine, Italy | Tue 23 Aug 2016 - Fri 26 Aug 2016'. Below this are four blue buttons with white text: 'INSTRUCTIONS FOR AUTHORS', 'IMPORTANT DATES', 'INVITED SPEAKERS', and 'SPONSORS'. A small white downward arrow is at the bottom center.
